Equinox message

September 2023 – Architects of our future

Once again, we enter the Autumnal Equinox associated with the sign of Libra and Key 11, Justice.

Key 11 is assigned the letter Lamed, which means goad to guide oxen, animals domesticated by human beings, which have been of great help to us, especially in agriculture.

The Autumnal Equinox is a time of harvest. Humanity reaps today the fruit of what has been sown in the past, whether bitter or sweet.

This Key 11, Justice, has to do with karma, which we associate with the results of past actions. Some of humanity mistakenly sees karma as an unalterable destiny. The Ageless Wisdom teaches us that the karma we reap now is the fruit of past good and bad deeds. The good news taught in our lessons is that we can change future karma when we select well the seeds of what we sow now, here and hereafter, consciously with the creative imagination, so that good fruits of peace, love, health and unity will be harvested at the new Equinox.

As B.O.T.A. students we have the privilege to participate in sowing seeds of hope, love, peace and happiness with our personal and group meditations, such as those we do together in the Open Forums, the Regional Meetings, the international and regional Zoom meetings and especially with our personal daily work at home.

Man is the architect of his future. Karma, which manifests itself as indestructible justice, can be controlled by the man who has done the Great Work and has united his personal will with the Universal Will.

In this work we need faith, not blind faith, but reasoned faith founded on confidence of the unfailing operation of the Primal Will-to-Good, working through centres of expression such as ourselves. So we know that in the end the Great Work destined for this earth and this humanity will be a success. A world of brotherhood, founded in unity and love arising from the Heart of God and expressing through all human hearts into all kingdoms of nature. Let us continue to work together towards that Goal.

With love in L.V.X.,

The Builders of the Adytum
